

REMARKS

Claims 16 – 19 are the claims of record of the application. Claims 16–18 have been allowed and claim 19 has been rejected.

Applicants have amended the only rejected claim: claim 19 to add the feature of the receiving being of differential encoded OFDM signals via multiple antennas, a feature not disclosed or described in the cited art.

Applicant has also added new claim 20, which is an apparatus claim that includes the features of claim 16 that have already been deemed to be allowable in allowed claim 16. Applicants therefore assert a new search is not needed for claim 20, and that claim 20 is allowable.

For these reasons, and in view of the above amendment, this application is now considered to be in condition for allowance and such action is earnestly solicited.

Conclusion

The Applicants believe all of Examiner's rejections have been overcome with respect to all remaining claims (as amended), and that the remaining claims are allowable. Action to that end is respectfully requested.

If the Examiner has any questions or comments that would advance the prosecution and allowance of this application, an email message to the undersigned at dov@inventek.com, or a telephone call to the undersigned at +1-510-547-3378 is requested.

Respectfully Submitted,

November 8, 2007
